

29th Annual International Workshop on the Global Programme Zone

Saturday 9th November 2024

10.00 to 12.00

Your invitation to join us by Zoom

This meeting is suitable for Scouts and Explorers as well as leaders

This Annual Workshop brings together those interested in undertaking activities within the global programme zone and to generate ideas and activities how Scouts can help others.

We will consider global events including changes in climate resulting in more extreme weather events and loss of life, creating peace through understanding other people, reducing hunger and poverty and how Scouts can make a difference. So, in this interconnected world we need to ensure that we have the skills to help others who are in need.

Our programme will include –

- Our annual ranking of human needs and concerns and how Scouts can make a difference.
- Contributing to sustainable development goals.
- How Scouts can prevent malaria.
- Providing clean water.
- Update on Scouting links and visits abroad.
- Sectional activities for the global programme zone

If you would like to contribute and/or take part please let me know by email.

I will send you the zoom link towards the end of October.
